

Grip Head System

Specifically designed to position and hold ARRI scrims and flags, floppies, cutters, dots and fingers. The simple, efficient concept behind grip clamps and dedicated arms allows you to support all light control accessories, while the special construction and the variety of available options let you stop, bounce and soften lights in every position you could need.

Grip Head System

The perfect grip for your light modification accessories.

- Our Grip Heads have been specifically designed to hold scrims, flags, floppies & cutters mounted on Century stands, or butterfly frames mounted on overhead stands during film, video or photo shoots.
- Extension offset arms, used in combination with Grip Heads, provide an extended grip point for scrims, flags and small lights, and are available in two lengths: 20" (51cm) and 40" (102cm).
- The Grip Head can be combined with other accessories to solve most light and light modification accessory positioning problems.
- Grip Heads are available in two specific diameters, the standard is 2 1/2" (8mm) the Jumbo version is 4 1/2" (10mm).
