

# Pump Cup & Wall Plates

When you need to hold a light, panel or accessory but the available surface is flat as a mirror, with no way to clamp to it, we still provide a solution: a complete system of plates equipped with standard pins and bushings or a suction pump cup for stunning bonds to glass surfaces.

# Pump Cup & Wall Plates Pump Cups

Solid light mounting solutions for smooth surfaces.

- Suction cup support allows you to mount small lights and accessories on walls, floors, ceilings, windows, mirrors or any smooth flat surfaces where other mounts are not appropriate.
- Our design ensures the load is held much closer to the support surface increasing load capacity.
- You can even get support on the move by mounting the suction cup to a vehicle window.

## L2.88703.0 / LS.241

PUMP CUP WITH 16mm SWIVEL SOCKET

**W** 1.2kg

**B** 16mm

Suction cup for small fixtures and lightweight equipment. Ø: 150mm. 16mm bushing with safety pin.
