

Compact Matte Box MB-20 I

The MB-20 System is a compact 5.65" x 5.65" matte box for use with lightweight support, as a clamp-on version or with adapters for 19 mm or 15 mm studio rods.

The MB-20 compact matte box easily adapts for use with lightweight support, bridge plate support rods, or clamped onto and supported by the camera lens. With a swing-away front, the system works with wide-angle lenses and provides two or three independently rotating filter stages for filter sizes up to 5.65" x 5.65". The MB-20 System includes a unique adjustment system to ensure a precise fit. Optional top, bottom and side flags and masks are available for optimal light control.

Main Features

- Designed for film and digital cameras
