

Bug-203 PL for Pro DSLR

The Bug-203 PL is a quick access, multi-featured professional backpack designed to fit a Pro DSLR with up to a 300mm lens attached + 4-5 lenses + extra camera body + flash and accessories, or a small HDV camcorder with accessories. It will also accommodate up to a 15.4" laptop. The unique design provides quick, separate access to your main camera and lens set-up while your primary lenses, flash and other accessories fit snugly in the circumference and specific dedicated compartments can be arranged using the Aeriform Dividers. Secondary accessories such as cables, chargers etc. fit neatly out of the way in the zippered pockets on the front flap. Along the back a padded laptop compartment is located, while additional storage is available in the multiple flat external pockets, one of which is designated for a small water bottle. Note: Bug-KIT PL can be purchased separately if you wish to add a large 17" laptop sleeve, 2 large storage pouches and an adjustable waist belt.
