

Aladdin A Lite

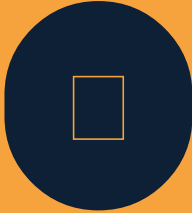

3220K or 5600K

Battery Runtime 2 hours

Dimming 5% - 100%

CRI 95

About the A Lite

The Aladdin A lite is a high end bi color on board light with an integrated battery .

The light quality of the Aladdin A lite is outstanding with a CRI and TLCI over 90< either in tungsten or daylight.

The A lite comes with an integrated battery with a runtime of 1-2 hours and can be charged over the micro USB . Enabling you to charge the A light from any USB charger, laptop or battery with a USB Plug.

The A lite is the slimmest and very light weight on board light on the market and the housing is made from aircraft aluminum.

The light comes with a standard ¼ thread to mount it on any on board adapter.

A plastic diffuser is included with the light, it makes the light softer and more comfortable to look into it.

The A lite is adjustable from tungsten to daylight and completely dimmable from 5-100%.

In the box:

1x A lite

1x Diffusion filter

1x USB cable
