Battery Runtime 2 hours

Dimming 5% - 100%

CRI 95

About Eye Lite

The Eye lite is a small high quality performance LED light with an integrated battery for a runtime of up to 2 hours.

The Eye lite comes in three different versions, daylight, tungsten or RGB.

The quality of the light is outstanding with a very high CRI and TLCI.

The Eye lite has an integrated micro USB plug for charging. It comes with an integrated dimmer which enables you to dim the light from 5-100%. The Eye lite housing is made out of aircraft aluminum.

The Eye light has been developed for many different applications like an on board light or as the name says a little eye light to create a reflection in the eye. Many people use it as a practical light to hide in furnitures, shelves or in lamps. It can be used in narrow spaces like cars, elevators or inside products for product photographers.

The Eye light integrated battery gives you a runtime for over 2 hours and can easily be recharged over any USB charger with a micro USB plug.
